OBJECTIVE

Dedicated .NET Developer with over 3+ years of experience in designing, developing, and deploying high-quality software solutions. Proficient in leveraging the latest .NET technologies to create scalable and efficient applications. Strong problem-solving skills, coupled with the ability to quickly grasp new technical concepts and apply them effectively. Seeking a challenging role in a growth-oriented environment where I can contribute my expertise and continue to advance my skills in software development.

EXPERIENCE

Love In Store technologies – Gurgaon (Dot Net Developer -L2)

May 2026– Present

- Leading the migration of existing databases from SQL Server to PostgreSQL (PGSQL), including schema conversion, query optimization, data validation, and application-level integration..
- Refactored SQL queries, stored procedures, and database logic to ensure compatibility and performance in PostgreSQL.
- Accelerated production deployments by implementing and optimizing **CI/CD pipelines**, reducing manual deployment effort and improving release reliability.
- Leveraged **Claude Code** to accelerate development, refactoring, debugging, and code-generation workflows, improving overall development productivity.

Jazz Travels – Delhi (Software Engineer)

March 2025 – May 2026

- Spearheading the design and development of scalable travel management applications using .NET Core Web API, MVC, and SQL Server.
- Implemented real-time booking and payment integration, improving transaction efficiency by 30%.
- Developed custom dashboards and reporting tools for management to track sales, revenue, and customer trends.
- Introduced best practices for clean architecture, dependency injection, and version control (Git).
- Optimized database queries and designed stored procedures, triggers, and functions to enhance performance of high-traffic modules.
- Involved in database design on SQL Server 2024 and development of different database objects containing functions, triggers, and stored procedures.
- Developed MVC based applications using C# and .NET Framework.
- Worked on integrating and maintaining multiple payment gateways including Square, Opayo (SagePay), Stripe, and ConnexPay, handling secure transactions, payment flows, and API integrations.

Freelance – Customer Feedback & SMS Automation System (Subway India), Gurgaon

8 Months

- Contributed to a feedback system built using React and backend services, enabling automated customer engagement across 800+ stores and warehouses.
- Integrated third-party APIs (including POS systems) using background services to fetch and sync transactional data into a centralized database.
- Implemented SMS notification workflows using MegaTalk API to send feedback links to customers based on transaction events.
- Worked under senior guidance, assisting in API integration, data handling, and system optimization tasks.

JP Soft Inc – Gorakhpur (.NET Developer)

Aug 2022 – Apr 2024

- Developed and maintained numerous web applications using C#, .NET 4.0, and SQL.
- Developed Windows Form applications using C# and .NET Framework.
- Updated and managed existing products, offering valuable technical support to clients and colleagues.
- Performed client-side and server-side validations in MVC Razor using jQuery and Ajax.

- Designed and developed various abstract classes, interfaces, and classes using object-oriented principles to construct business logic using C#.

PROJECTS

Fare API – Flight Fare Aggregation & Distribution | Jazz Travels (India: Onsite)

Tech Stack: C#, .NET Core Web API, ADO.NET, Redis | Team Size: 1

Developed a scalable Fare API solution that collects fares from multiple Global Distribution Systems (GDS), applies configurable markups and discounts managed via CRM, and distributes results to top travel comparison websites. Built using a microservices-based architecture with seamless frontend, backend, database, and third-party integrations.

Payment API | Jazz Travels (India: Onsite)

Tech Stack: C#, .NET Core Web API, ADO.NET, Redis | Team Size: 1

- Flexible payment API built using the Builder Pattern supporting Stripe, SagePay, Square, ePDQ, and Moneris.
- Handles 3D Secure (3DS) authentication and end-to-end payment lifecycle including authorization and capture.

Subway India – Feedback Management & Pulse Panel System | (On-Site)

Tech Stack: C#, .NET Core Web API, ADO.NET, React, SQL Server | Team Size: 3

- End-to-end development of a scalable Feedback Management System integrated with POS systems across 800+ stores.
- Implemented background services to trigger SMS notifications via mTalk API post billing.
- Developed the Pulse Feedback Panel – low ratings (≤ 6) auto-generate tickets escalated to SM, AM, RM, and VP.

BackOffice Support | Jazz Travels (India: Onsite)

Tech Stack: C#, .NET Core Web API, ADO.NET, Redis | Team Size: 1

Developed and maintained ASP.NET solutions handling backend development, database operations, and system maintenance.

Juan Life Insurance | Agile Insurance Agency (Philippines: Offsite)

Personal Accident Insurance application providing financial aid for accidental death, disability, and medical reimbursement. Microservices-based architecture with payment and insurance provider integrations.

HPOS POS Application | Hassan's Opticals (Kuwait: Offsite)

Modern POS application using .NET Core and React — streamlining sales, billing, and inventory management with real-time stock updates, customer management, invoicing, and reporting dashboards.

KEY SKILLS

.NET Framework & .NET Core | C# Programming | ASP.NET MVC & Web API | Entity Framework & LINQ | SQL Server & T-SQL | JavaScript, HTML, CSS & React.js | OOP | Git | Dependency Injection | Troubleshooting & Debugging

EDUCATION

MCA (Distance) – IGNOU	Pursuing
BBA – DDU Gorakhpur University	Completed – 2024
Intermediate (CBSE) – Army Public School	2021
High School (CBSE) – Army Public School	2017

PERSONAL DETAILS

Date of Birth:	28 May 2001
Nationality:	Indian
Languages:	English & Hindi
